

# BOLT320

A product from the Zeus Technology range

## Integrated Lighting Control System

The BOLT 320 is an integrated lighting control system for dimming and controlling LEDs. It is easy to install, easy to configure and easy to operate and has been designed specifically for the marine industry. It simplifies LED and onboard lighting integration.

### What does it do?

It provides control of onboard LED lights. This includes dimming, lighting scene settings and support of emergency lighting.

### What makes it ideal for the marine industry?

The BOLT 320 has been developed with onboard installation, configuration and operation in mind. It supports emergency lighting. It provides real time scene and mood settings. You can set the trim of the LED.

### Is it easy to install?

You don't need to be a lighting or engineering expert to install the BOLT 320. It is supplied ready to install with minimal configuration and all the guidelines required for self installation. Should you wish to install as part of a wider, more complex technical system, control modules for integration with third-party control systems are also available.

### Key Features

- Supports up to six Zeus Connect switches per controller
- Input for emergency lighting for automatic switch to emergency supply and lighting scene
- Scenes can be programmed for the switches
- Modular, Self contained unit
- Integration to Crestron, Control 4, AMX and Savant
- Scenes can be programmed for external I/O triggers and emergency setting

## Key Facts

- Four 0-10v industry standard dimming channels
- Direct connection of LEDs with inbuilt drivers / external 0-10v compatible drivers
- Connection via a simple low voltage 3 wire bus system
- Incoming DC range 12v to 28v
- Conventional ethernet port for connection to third party control systems
- Configuration via simple web-based user interface
- In-built Wi-Fi for stand alone set up

## About Zeus Technology

The BOLT 320 is a product from the Savage Lighting Zeus Technology range. Products within the Zeus range are developed in-house either exclusively by Savage Lighting or in collaboration with leading technology partners. The Zeus Technology Partner behind the BOLT 320 is Crest Systems. Their extensive experience in technical system integration and lighting and control systems form an integral part of the product design, technology and engineering.

## About Savage Lighting

Savage Lighting are the leading designer & manufacturer of lighting for the superyacht and marine industries. They are specialists in LED lighting, work with the industry's leading shipyards, designers & electrical contractors and have been supplying the marine industry with interior & exterior lights for over two decades.
