Living the yacht with a simple touch

Videoworks Marine Services: Control software with client ITWMode

"Animate a curtain to let the light filter. Enjoy relax at the desired temperature, watching a movie on demand, or simply drinking a sophisticated and refreshing cocktail only by touching the screen…
Search the absolute silence falling asleep in a bed, protected by a futuristic sound-proof bubble..."

The dream becomes reality with **Videoworks S.p.A.**, which for more than 20 years has been building sophisticated systems, audio/video, entertainment, internal and external communications and advanced home automation. Discrete systems where everything is designed at four hands with the owner and where each edge technology is combined with the demands of space and aesthetics of the yacht. Wiring included.

Itworks
Ingegneria e sviluppo sistemi

The control software is a client app based on the framework of development **IT-WMode** which allows the iPAD become a real "Smart Remote Control" . It interfaces with the main control systems on the market.
Thanks to the **ITW Mode App**, which acts as a "container" that can be "filled" with various functions, the control software allows for example to display on the IPAD Maps NMEA information or real time videos from CCTV…
The **ITWmode App** is conceived in exclusive for Videoworks by **ItWorks**. It is easily downloadable from the Stores and it is totally free. Thanks to this APP, **Videoworks** can meet every Owner and Guest needs. The APP is compatible with every device and is available also in a web version, which is compatible with the Android devices and with other Clients, such as Google Chrome. Thanks to this App, the management of customized services will be possible in both graphics and contents, so that to meet every needs. It is a MULTISERVICE APP, which allows the management of every service from one's own device also: once you are onboard, you only need to download the APP and you will have an incredible number of opportunities available!

MyConcierge

Thanks to this innovation, you can have a five star service onboard, wherever you are, with a simple click. The Owner and the Guests can order refreshing cocktails or snacks from the menu. The orders will arrive directly to the Chef and the Crew, with a simple alert that can be easily heard and shown on every touch panel, personal device and wearable device (watches and Google Glasses). Moreover, the Chef can update the menus with suggestive images, autonomously and in an easy way.

MyInfos
The new and advanced information system for yachts

Developed in HTML5 for easy integration with the Apple TV, MyInfos is the key part of the entertainment-info-domotics system on board of the yacht. The system allows you to perform various tasks and view the information you need on any monitor with a simple touch of a Crestron or AMX display. In this way the most demanding services are combined and displayed anywhere, anytime, easily: CCTV / CHARTING / GOOGLE EARTH / NMEA / WEATHER / COMMUNICATION FROM THE CAPTAIN / GOOGLE EARTH 3D
MyInfos Home

It is an advanced version of the MyInfos service, which allows the Owner to monitor and manage its Yacht even when far from it. This will be possible thanks to real time images being shown on his mobile or personal device. In fact, this service generates a sort of tracking chart, recurring the rout of the Yacht by sending 3D images as well.
MyCerberus

The exclusive "MyCerberus" service allows to intervene immediately in case of faults that may occur in the installed systems, even before the customer might notice or detect them. MyCerberus sends malfunctioning alerts directly to the Videoworks helpdesk in real time, allowing Engineers to take immediate action remotely. This innovative and efficient service offered by Videoworks breaks down then all the delays and possible nuisance to the users who will receive instead immediate assistance. The fact that it is a software product developed in-house ensures a quick integration with new products and new diagnostic technologies.

MyConnections

It's a web local APP based on a CISCO Router that allows you to manage 4 types of internet connections on board. In a simple and secure way: VSAT / FLEET BROADBAND / UMTS / WI-FI. The access of the users (Owners, Guests, Captain, Crew) to the network is controlled by the DIRECTOR OF THE APPLICATION. The correct user login is guaranteed by: PASSWORD / UNIQUE NUMBER OF THE DEVICE. THE DIRECTOR OF THE APPLICATION can: Create and cancel the users. Create scenarios i.e. «Owner at work» which immediately determines who can and can not access the Internet.

MyScreen
Video streaming on tablet and smartphone

A solution that allows you to watch videos on streaming on your tablet or smartphone. The video to be transmitted can be from any type of channel: Satellite, TV, DVD, Decoder...
And thanks to the HTTP protocol segmented can be displayed in high definition on iOS devices, Android and Windows 8.
It's also possible to transmit the video on multiple devices SIMULTANEOUSLY.
