

The Ingenious Service Call

GEST is exclusively designed for those who demand nothing but the very best. Excellent service and unrivalled privacy are at the core of the GEST service call system - easily enabled with a simple WiFi connection. Location-aware, efficient and with a two-way communication feature, with GEST your needs are truly taken care of. Intuitively, at your request.

The Collection

All models are further customisable

What makes GEST unique?

Easy Integration

Simply connect to your WiFi
No additional cables or base stations required

GEST Service App

A dedicated app offering efficient handling for service attendants API and Crestron integration also available

Sophisticated Design

Using the finest materials and offering a world of customisation

Emergency

Emergency calls can be made both from and to your GEST button for enhanced safety

Hardware Monitoring

The battery status, temperature and connectivity of the button is constantly monitored and shown in the app

Assignable Buttons

GEST buttons can be assigned to a location or to a person

Local or Cloud

Have your GEST managed completely stand-alone with the GEST micro server or tap into the Cloud service

Wireless Charging

GEST buttons work with wireless chargers using the industry standard Qi protocol for wireless charging

Intuitive

Using touch, light, sound and a clean app design, GEST provides clear indications about the status of a service call
