YACHTWERFT MEYER GMBH

CATEGORIES: CARBON FIBRE & KEVLAR NAVAL ARCHITECTS, FENDERS & MOORING, LUXURY GOODS, TENDERS & INFLATABLE

With over 100 tenders on the water, many of them custom-built, yachtwerft-meyer has continuously developed its product portfolio through the Silverline, Signature and Performance lines to offer a complete range of tenders for the superyacht sector.

Flexibility is the name of the game for this demanding market sector, and yachtwerft-meyer's **Silverline** series offers just that. Built around a semi-custom engineering platform to a proven hull design, Silverline has a short build time, yet is highly customisable with a large range of features for the client to choose from.

Signature is yachtwerft-meyer's fully custom-made, luxury tender concept. A broad choice of RIBs, SOLAS tenders and other exclusive utility tenders is offered within yachtwerft-meyer's **Performance** range.

Innovation based on excellent engineering skills and 'made in Germany' quality is bringing our tenders to the next level. They are now as quiet as your car – just 66dBa at the helm station, even at 40 knots, thanks to amazing noise suppression. Our tenders will soon become even quieter by means of electric propulsion, and the first concept is already in progress.
