## Hydraulic Swim Step 500 (HSS-500)

The Innovative people at Nautical Structures Industries have just released the new HYDRAULIC Swim Step 500. The HSS-500 solves the problem of entering or exiting the water from your boat. With ease of use and operation the HSS-500 makes your boating even more enjoyable for all. No one needs to struggle to climb an undersized ladder. Now you and your guests can simply step onto the HSS-500 and be gently lowered into or raised out of the water.

The HSS-500 is constructed of 316L stainless steel to withstand the rigors of salt water. This compact swim step can be conveniently controlled by either a wireless remote or a rocker switch located on your boat. Leave it to Nautical Structures to enhance your boating pleasure.

Patent pending on HSS-500
