REINVENTING TRADITION.

List GC Manufacturing Plant - Bad Erlach, Austria

A GREAT FOUNDATION.

Strong family spirit and great visions are the cornerstone of our success.

Franz List Senior opened a small furniture workshop in Aspang, Lower Austria, in the early 1950s. The List family have owned the business since it was founded, and it is their pioneering spirit and entrepreneurship that have pushed the company forward over the decades. Operating under the name List General Contractor GmbH (List GC) since 2000, the company now runs several successful lines of business all over the world: We furnish **exclusive motor and sailing yachts, as well as exquisite apartments and residences** – all neatly combined with high-profile project management.

List GC is now in the hands of the third generation of the List family. Project management and joinery are deeply rooted in our professional life, especially since the opening of our new manufacturing plant including CAD engineering, production engineering, pre-production, surface area and assembling area in Bad Erlach in June 2017.

AN EXCEPTIONAL APPROACH.

Without our employees' holistic working method, our results would just be ordinary.

At List GC, we love to turn great ideas into great interior. Challenges? We relish them! The know-how, experience and performance of our highly skilled team have been recognized by many clients around the world and we are eager to develop these skills further. Day in, day out. We believe in the benefits of top-quality materials, the art of engineering and superior craftsmanship. And we know the meaning of holistic processing: As a general contractor and implementer, we are able to offer everything from a single source, covering all areas **from planning and project management through to manufacture and assembly right up to turnkey handover**. Our experience also makes us a reliable partner in the **refit and after-sales sector** – for our aim is to take something special and make it even more extraordinary.

The processing of highly complex projects is our hallmark and we are the experts in this sector. Don't hesitate to set us new challenges, because what challenges us pushes us further!

A REMARKABLE BRAND.

*Without our unique **Specialists**, there would be no special touches.*

Our **Specialists** live for their work and through their dedication, they fulfill the most exclusive design wishes and demanding customer requests with the best results possible. In doing so, they perfectly **combine the traditional values of our family company with innovation and creativity.**

When discussing all the little touches, they are passionate to find out what our customers really want and are only satisfied if our clients are. They master every challenging situation and work tirelessly to find new and fresh approaches until the finished result is as unique as intended. They put their hearts into every piece, strive for absolute perfection in every last detail and turn the most special materials into one-of-a-kind furnishings.

So, although the people working at List GC are all very different, they all pull together to make the company as special and unique as it is.

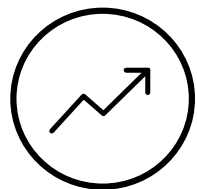

FROM BAD ERLACH AROUND THE WORLD.
